

# Geetesh Laddha

I'm a full-stack developer with 5+ years of experience building scalable, maintainable, and reliable web applications. Passionate about crafting exceptional user experiences and solving complex challenges with modern technologies.

## Work Experience

### Senior Software Engineer, Tericsoft (Nabis)

Nov 2024 - Present

- Worked on the core team to design and develop the compliance and logistics applications for cannabis distribution
- Solved complex problems related to inventory management, order processing, and compliance reporting

### Senior Software Engineer, Sorice Solutions (4Medica)

Jan 2023 - Oct 2024

- Developed healthcare applications using Typescript, ReactJS, NodeJS/NestJS, MongoDB, FHIR, Elasticsearch, Kafka, gRPC, Redis, and Angular
- Built lab order management system connecting healthcare providers, facilities, and patients
- Implemented patient data management system across multiple applications
- Developed management solutions for healthcare platforms

### Full Stack JavaScript Developer, PillarPlus

July 2020 - Dec 2022

- Developed algorithms for complex MEP (Mechanical, Electrical, Plumbing) solutions using Typescript, ReactJS, NextJS, NodeJS, Postgres, MongoDB, Redis and more
- Implemented real-time geometry and graphics solutions using graph and canvas libraries
- Designed complex form builders and analytics systems at Towercop
- Led development teams and provided architectural guidance for multiple applications
- Managed code quality and technical decision-making across projects

### Freelance Web Developer

Nov 2019 - Jul 2020

- Developed MVPs using NodJS ReactJS, NestJS, and PostgreSQL stack
- Built scalable applications that accelerated business funding rounds
- Implemented rapid go-to-market solutions enabling faster customer acquisition

## Open Source Projects

### Reacty Form - ([Github](#) | [NPM](#))

Reacty-form is a React form management library that provides a set of hooks and components (very similar to react-hook-form) to manage form state efficiently. It leverages the power of [Legend-State](#) for state management, offering fine-grained reactivity and performance optimizations.

### Prisma to Drizzle Query Transformer - ([Github](#) | [NPM](#))

The PrismaToDrizzleTransformer is a utility that transforms Prisma query objects into Drizzle ORM query objects. This allows you to leverage the powerful querying capabilities of Drizzle ORM while using the familiar Prisma query syntax.

## Skills

- **Languages** - JavaScript, TypeScript, Python
- **Frontend** - HTML, CSS, ReactJS, NextJS, SolidJS, Astro, Qwik
- **Cross Platform** - React Native
- **Backend** - NodeJS, ExpressJS, NestJS, Fastify, Mercurius
- **Databases** - MongoDB, PostgreSQL, Redis, Elasticsearch, FHIR
- **Concepts** - CQRS, Design Patterns
- **Tools** - Git/Github, Nx, VS Code, Docker, Kafka
- **Protocols** - HTTP, WebSocket
- **Cloud** - AWS (EC2, S3, RDS, SNS, SQS, Lambda)
- **O.S.** - Ubuntu, Windows, MacOS
- **More** - GraphQL, RestAPI, gRPC

## Education

### MPS Pratap Nagar

XII (Senior Secondary) | Commerce  
2017-2018  
94.6 %

### University of Rajasthan

Bachelor of Computer Application  
2018-2021  
73 %
